The table above shows Funds From Operations Available to Common Stockholders ("FFO") and the related reconciliation to Net Income (Loss) Available to Common Stockholders for Cousins Properties Incorporated and Subsidiaries. The Company calculated FFO in accordance with the National Association of Real Estate Investment Trusts' ("NAREIT") definition, which is net income (loss) available to common stockholders (computed in accordance with accounting principles generally accepted in the United States ("GAAP")), excluding extraordinary items, cumulative effect of change in accounting principle and gains or losses from sales of depreciable property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures to reflect FFO on the same basis.

FFO is used by industry analysts and investors as a supplemental measure of an equity REIT's operating performance. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. Thus, NAREIT created FFO as a supplemental measure of REIT operating performance that excludes historical cost depreciation, among other items, from GAAP net income. Management believes that the use of FFO, combined with the required primary GAAP presentations, has been fundamentally beneficial, improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful. Company management evaluates operating performance in part based on FFO. Additionally, the Company uses FFO along with other measures, to assess performance in connection with evaluating and granting incentive compensation to its officers and other key employees.

This schedule shows same property net operating income and the related reconciliation to rental property revenues and rental property expenses. Net Operating Income is used by industry analysts, investors and Company management to measure operating performance of the Company's properties. Net Operating Income, which is rental property revenues less rental property operating expenses, excludes certain components from net income in order to provide results that are more closely related to a property's results of operations. Certain items, such as interest expense, while included in FFO and net income, do not affect the operating performance of a real estate asset and are often incurred at the corporate level as opposed to the property level. As a result, management uses only those income and expense items that are incurred at the property level to evaluate a property's performance. Depreciation and amortization are also excluded from Net Operating Income. Additionally, appraisals of real estate are based on the value of an income stream before interest and depreciation. Same Property Net Operating Income includes those office and retail properties that have been fully operational in each of the comparable reporting periods. Same Property Net Operating Income allows analysts, investors and management to analyze continuing operations and evaluate the growth trend of the Company's portfolio.

Amounts included in the estimated project cost column represent the estimated costs of the project through stabilization. Significant estimation is required to derive these costs and the final costs may differ from these estimates. The projected dates for opening and stabilization are also estimates and are subject to change as the project proceeds through the development process.
- (2) Amount represents 100% of the estimated project cost. The projects are being funded with a combination of equity from the partners and \$61.1 million and \$15 million of construction loans for Emory Point and Mahan Village, respectively. As of June 30, 2012, \$17.9 million and \$6.0 million were outstanding under the Emory Point and Mahan Village loans, respectively.
- (3) Estimated opening represents the quarter within which the Company estimates the first retail space to be open for operations and the quarter the Company estimates the first apartment unit to be occupied.
- (4) Estimated stabilization represents the quarter within which the Company estimates it will achieve 95% economic occupancy on the retail space and 93% on the apartments.
- (5) Company's ownership interest is shown at 100% as Mahan Village is owned in a joint venture which is consolidated with the Company. The Company receives a preferred return on cash flows from the venture and receives its contributed capital and an IRR look-back prior to any distributions to the partner related to its capital.

(1) Non-recourse loans are subject to customary carve-outs.

(2) Total borrowing capacity of the Credit Facility at June 30, 2012 was \$277.3 million based on certain covenant calculations. The spread over LIBOR at June 30, 2012 was 1.60% based on covenant calculations.

(3) The ownership percentage of the venture holding these loans and the allocation of results of operations and/or gain or loss on property sales may be disproportionate.

(4) The real estate and other assets of this property are restricted under a loan agreement such that these assets are not available to settle other debts of the Company.

(5) Gateway Village debt is non-recourse to the Company and the Company receives an 11.46% current return on its \$10.4 million investment in Gateway Village. Upon liquidation of the venture, the Company may receive up to a 17% internal rate of return on its investment. Based on the nature of the investment, this debt is excluded from total debt in the Company's credit facility financial covenant calculations.

(6) Maturities include lump sum principal payments due at the maturity date. Maturities do not include scheduled principal payments due prior to the maturity date.

COUSINS PROPERTIES INCORPORATED DISCUSSION OF NON-GAAP FINANCIAL MEASURES

The Company uses non-GAAP financial measures in its filings and other public disclosures. The following is a list of non-GAAP financial measures that the Company commonly uses and a description for each measure of (1) the reasons that management believes the measure is useful to investors and (2) if material, any additional uses of the measure by management of the Company.

“2nd Generation Tenant Improvements and Leasing Costs and Building Capital Expenditures” is used in the valuation and analysis of real estate. Because the Company develops and acquires properties, in addition to operating existing properties, its property acquisition and development expenditures included in the Statements of Cash Flows includes both initial costs associated with developing and acquiring investment assets and those expenditures necessary for operating and maintaining existing properties at historic performance levels. The latter costs are referred to as second generation costs and are useful in evaluating the economic performance of the asset and in valuing the asset. Accordingly, the Company discloses the portion of its property acquisition and development expenditures that pertain to second generation space in its operating properties. The Company excludes from second generation costs amounts incurred to lease vacant space and other building improvements associated with properties acquired for redevelopment or repositioning.

“EBITDA” represents FFO plus consolidated and Company share of unconsolidated interest expense, non-real estate depreciation and amortization, income taxes, impairment losses, gain/loss on debt extinguishment and interest rate swap, and preferred stock dividends. Management believes that EBITDA provides analysts and investors with appropriate information to use in various ratios that evaluate the Company’s level of debt.

“Funds Available for Distribution” (“FAD”) represents FFO adjusted to exclude the effect of straight-line rent and above and below market lease amortization less 2nd Generation Tenant Improvements and Leasing Costs and Building Capital Expenditures. Management believes that FAD provides analysts and investors with information that assists in the comparability of the Company’s dividend policy with other real estate companies.

“FAD Before Certain Charges” represents FAD before non-depreciable impairment losses, write off of predevelopment expenses, gain/loss on debt extinguishment and interest rate swap, valuation allowances on deferred tax assets and separation charges. Management

believes that FAD Before Certain Charges provides analysts and investors with appropriate information related to the Company’s core operations and for comparability of the results of its operations and dividend policy with other real estate companies.

“Funds From Operations Available to Common Stockholders” (“FFO”) is a supplemental operating performance measure used in the real estate industry. The Company calculates FFO in accordance with the National Association of Real Estate Investment Trusts’ (“NAREIT”) definition, which is net income (loss) available to common stockholders (computed in accordance with accounting principles generally accepted in the United States (“GAAP”)), excluding extraordinary items, cumulative effect of change in accounting principle and gains or losses from sales of depreciable real property, plus depreciation and amortization of real estate assets, impairment losses on depreciable investment property and after adjustments for unconsolidated partnerships and joint ventures to reflect FFO on the same basis.

FFO is used by industry analysts and investors as a supplemental measure of an equity REIT’s operating performance. Historical cost accounting for real estate assets implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. Thus, NAREIT created FFO as a supplemental measure of REIT operating performance that excludes historical cost depreciation, among other items, from GAAP net income. Management believes that the use of FFO, combined with the required primary GAAP presentations, has been fundamentally beneficial, improving the understanding of operating results of REITs among the investing public and making comparisons of REIT operating results more meaningful. Company management evaluates operating performance in part based on FFO. Additionally, the Company uses FFO and FFO per share, along with other measures, as a performance measure for incentive compensation to its officers and other key employees.

“FFO Before Certain Charges” represents FFO before non-depreciable impairment losses, write off of predevelopment expenses, gain/loss on debt extinguishment and interest rate swap, valuation allowances on deferred tax assets and separation charges. Management believes that FFO Before Certain Charges provides analysts and investors with appropriate information related to the Company’s core operations and for comparability of the results of its operations with other real estate companies.

COUSINS PROPERTIES INCORPORATED DISCUSSION OF NON-GAAP FINANCIAL MEASURES

“Net Operating Income” is used by industry analysts, investors and Company management to measure operating performance of the Company’s properties. Net Operating Income, which is rental property revenues less rental property operating expenses, excludes certain components from net income in order to provide results that are more closely related to a property’s results of operations. Certain items, such as interest expense, while included in FFO and net income, do not affect the operating performance of a real estate asset and are often incurred at the corporate level as opposed to the property level. As a result, management uses only those income and expense items that are incurred at the property level to evaluate a property’s performance. Depreciation and amortization are also excluded from Net Operating Income for the reasons described under FFO above. Additionally, appraisals of real estate are based on the value of an income stream before interest and depreciation.

“Same Property Net Operating Income” represents the Net Operating Income and Cash Basis Same Properties. Cash Basis Net Operating Income excludes straight-line rents, amortization of lease inducements and amortization of acquired above and below market rents. Same Properties include those office and retail properties that have been fully operational in each of the comparable reporting periods. Same-Property Net Operating Income allows analysts, investors and management to analyze continuing operations and evaluate the growth trend of the Company’s portfolio.
